

LOGIC & DECISION MAKING

POETRY OF PROGRAMMING – CLOJURE ASSIGNMENTS

- (1) Find the sum of those numbers between 1 and 1000 that are divisible by 7 but not divisible by 5.
- (2) How many numbers are there between 1 and 10000 that are divisible by 11 or by 13?
- (3) Write a function that returns "small number" for any number less than 100, "good number" for any number between 100 and 1000, and "big number" for anything bigger than a thousand. The function should return "not a number" if the given input is not a number.
